Okhotsk Drift Ice Botanical Garden

The temperature in the aquarium and botanical garden is -20°C. Flowers of Okhotsk have been preserved in ice.

Drift Ice Aquarium

Experience the severe cold of -20°C

In this room, you can actually experience the severe cold. It is kept at 20 degrees below freezing, the Mombetsu midwinter temperature. And you can touch real drift ice even in midsummer.

Various sizes of fish and shellfish from the Sea of Okhotsk are preserved in ice. From 1.6-meter-long sturgeon to tiny plankton, all preserved in ice!
